QF05/0407-٤,٠ E	Study Plan for Bachelor program - Study Plan Development and Updating Procedures/ Management Information Systems Department
-----------------	--

Course Plan for Management information systems (Bachelor Program) No.: (2021-2022)

Approved by Deans Council by decision (21-2020/2021) dated (23/8/2021)

(132) Credit Hours

Study system / hybrid program

Type of speciality

Humanitarian

Scientific /
technical

Medical
Sciences

Teaching style	Percentage of study plan hours / number	Model used (synchronous: asynchronous)
Complete e-learning courses	20% Maximum / number(27) C h	1:1
Blended Learning courses (For Humanity)	40% Maximum / number (54) C h	1:1
Traditional learning courses (for humanity)	40% Minimum / number (51) C h	2:0

Important note: (The teaching patterns of the subjects are distributed at all academic levels in the program)

Program Vision: Excellence in teaching and scientific research in the fields of information systems and business analytics to enhance competitiveness in the labor market

Program Mission: To prepare innovative pioneers in the field of information systems and business analytics through solid applied technological education, enhance research expertise, and achieve distinction and progress of a sustainable society locally and globally.

Program Objectives:

1. Develop students' skills in analyzing and managing information systems to solve problems and achieve better knowledge of applied technology in making leadership decisions.
2. Building scientific knowledge in developing computer software that contributes to achieving operational excellence.
3. Develop students' decision-making skills to comply with the modern strategic and administrative objectives of the organizations.
4. Enabling students to acquire applied skills in technical areas of knowledge in analyzing, designing and developing institutional and strategic management systems.
5. To guide students in exploring and understanding administrative methods in coordinating information technology infrastructure and institutional systems.
6. Qualifying students to meet the needs of the local and regional market in the management and use of information technology in the business world.

Program learning outcomes ((MK= Main Knowledge, MS= Main Skills, MC= Main Competences)

Main knowledge	
MK1	Demonstrate a comprehensive, consistent, and structured knowledge of business technology management theories, concepts, and principles.
MK2	A comprehensive understanding of ways to solve the problems of digital organizations and business technology systems
MK3	Employ critical analysis thinking to assess opportunities, challenges, strengths and weaknesses in the local and global business environments.
Basic skills	
MS1	Possess a variety of skills for the needs of the labor market from leaders, entrepreneurs, innovators, analysts and professional designers.
MS2	Apply quantitative and analytical skills in solving complex problems and finding innovative and creative solutions to them.
General competencies	
MC1	Intelligent and flexible communication and effective and professional collaboration in diverse work teams.
MC2	The ability to lead through a set of professional values to practice digital business in accordance with global ethical standards of business conduct
